

Caitlin Chan Reynolds

(705) 991-0388 • caitlinchanreynolds@gmail.com • caitlinchanreynolds.vercel.app • github.com/404-CaitlinCR • Guelph, Ontario

PROFILE

Third-year Computer Science student at the University of Guelph with coursework in Operating Systems and Computer Networks, hands-on systems-level programming in C, and a genuine interest in cybersecurity and incident response. Proficient in Python, C, and Java with strong data structures and algorithms fundamentals, and comfortable working to the foundational layer, shown through a completed project integrating C and Python with careful memory management. Strong communicator with client-facing and leadership experience.

SKILLS

Languages: C, Python, Java, JavaScript, HTML, CSS • Currently building: C++

Foundations: Operating Systems, Computer Networks, Data Structures & Algorithms, OOP, Memory Management, C/Python Interop (ctypes)

Frameworks, Tools & Platforms: Git, Linux, macOS, Windows, SQL, Docker, Flask

Other: Leadership, Event Management, Intermediate French

SECURITY & CTF EXPERIENCE

- **Guelph Cyber Security Society CTF (April 2026)** — Competed in a cryptography-focused Capture the Flag event as part of a team, placing 6th overall in our first competition.

EDUCATION

Bachelor of Computing – Computer Science, University of Guelph

2024 – 2028

• GPA: 80.524

Relevant Coursework: Operating Systems (CIS*3110), Computer Networks (CIS*3210, in progress), Data Structures (CIS*2520), Analysis & Design of Algorithms (CIS*3490), Object-Oriented Programming (CIS*2430), Software Systems Development & Integration (CIS*2750)

PROJECTS

- **Treasure Runner (multi-language C/Python system, CIS*2750 project)** — Built a systems-level C backend with manual memory management and a graph-based state model, integrated with Python via ctypes, including custom exception handling to safely map C error codes into Python. Unit tested both layers.
- **Digital Closet (In Development)** — Cross-platform mobile app to photograph, catalog, and organize a wardrobe. Built with React Native and Expo; manages device camera access, local data models, and cross-screen state.
- **Pantry Pals** — AI recipe assistant integrating Google's Gemini API through a Python/Flask backend, with a JavaScript front end handling API requests, response parsing, and dynamic UI updates.
- **Personal Portfolio Website** — Built and deployed an interactive portfolio with custom image sliders and animation logic using HTML, CSS, and JavaScript.

HONORS & PUBLICATIONS

- **Improving Prediction of ADR in Elderly Patients Using Machine Learning Algorithms** — Research on ML-driven personalized medicine; 3rd place, STEM Fellowship Conference three-minute thesis.
- **Specialized High Skill Major (SHSM) Seals:** Information & Communications Technology, Aviation & Aerospace, Arts & Culture

LEADERSHIP EXPERIENCE

- **Mentor, Girls Learn Lego NXT Robots** — Taught girls about women in STEM and guided them through building and programming Lego NXT robots (2024).
- **Social Media Coordinator, Saints Action (2022–2024)** — Directed creative content and managed accounts across social platforms.
