Caitlin Chan Reynolds

(705) 991-0388 • caitlinchanreynolds@gmail.com • caitlinchanreynolds.vercel.app • github.com/404-CaitlinCR • Guelph, Ontario

PROFILE

Third-year Computer Science student at the University of Guelph with a passion for games, cybersecurity, and software engineering. Strong foundations in data structures, algorithms, and problem-solving in C, Python, and Java, and currently expanding into C++. Comfortable picking up new languages and tools quickly, shown through additional web and mobile projects built end to end (Flask, JavaScript, React Native). Track record of leadership, clear communication, and delivering projects independently and in teams.

SKILLS

Languages: C, Python, Java, JavaScript, HTML, CSS • Currently building: C++, SQL

Foundations: Data Structures & Algorithms, OOP, MVC Architecture, Memory Management, C/Python Interop (ctypes), Version Control (Git), Linux/Command Line

Frameworks, Tools & Platforms: Flask, Node.js, Docker, GitHub/Lab, Linux

Other: Figma, Canva • Leadership, Event Management, Community Engagement, Intermediate French

EXPERIENCE

- **ITSAC Student Representative, University of Guelph (2026-2027) —** Selected as a Student Representative on the IT Student Advisory Committee; provide feedback on campus IT services and contribute to continuous improvement initiatives, with reflections on IT service delivery and career pathways.
- **Guelph Cyber Security Society CTF (April 2026) —** Competed in a cryptography-focused Capture the Flag event as part of a team, placing 6th overall in our first competition.
- **Mentor, Girls Learn Lego NXT Robots (2024) —** Taught girls about women in STEM and guided them through building and programming Lego NXT robots.
- **Social Media Coordinator, Saints action (2022-2024) —** Directed creative content and managed accounts across social platforms.

EDUCATION

Bachelor of Computing – Computer Science, University of Guelph 2024 – 2028

- Anticipated Graduation: 04/2028 GPA: 82.063

Relevant Coursework: Data Structures, Object-Oriented Programming, Software Systems Development & Integration, Analysis & Design of Algorithms, Game Programming (Winter 2027)

PROJECTS

- **Treasure Runner (Sokoban-style puzzle game, CIS*2750 project) —** Built a system-level C backend with manual memory management and a graph-based state model, integrated with Python via ctypes, including custom exception handling to safely map C error codes into Python. Followed an MVC architecture and unit tested bth layers.
- **Pocket Pip (Personal Project, 2026) —** Gamified to-do web app where finishing tasks levels up a pixel-art virtual pet; built with HTML, CSS, JavaScript, and the HTML canvas, integrating email sign-in and cloud saves with Supabase.
- **Digital Closet (In Development) —** Cross-platform mobile app to photograph, catalog, and organize a wardrobe. Built with React Native and Expo; manages device camera access, local data models, and cross-screen state.
- **Pantry Pals (GDGHacks 2025) —** AI recipe assistant build in a 4-person hackathon team; Python/Flask backend integrating Google's Gemini PI, JavaScript front end.
- **Personal Portfolio Website —** Built and deployed an interactive portfolio with custom image sliders and animation logic using HTML, CSS, and JavaScript.

HONORS, PUBLICATIONS & CERTIFICATIONS

- **Improving Prediction of ADR in Elderly Patients Using Machine Learning Algorithms (2025) —** Research applying ML to personalized medicine; presented at STEM Fellowship Conference (3rd place, three-minute thesis).
- **Asian Heritage Month Artwork (2024) —** Original piece selected for exhibition at the PVNCCDSB Asian Heritage Month ceremony, 2024; featured in PtboCanada and the Peterborough Examiner
- **Specialized High Skill Major (SHSM) Seals:** Information & Communications Technology, Aviation & Aerospace, Arts & Culture.
- **Certifications:** DELF B1 (French), Innovation Creativity & Entrepreneurship, Multidimensional Health & Wellness Development, Basic First Aid.
